

# IWP Series

MORE HEAT FOR LESS MONEY.  
**infr**save  
radiant heaters

## patio comfort

Enclosed or covered patio? InfraSave's IWP gets the job done.

The IWP has many features of the IW\* harsh environment model. It's powder coated burner cabinet offers an economical solution for demanding applications. The IWP is the ideal heater for enclosed or covered patios - products of combustion are vented beyond the area. With a ten-year replacement warranty on the radiant tubes and ceramic burner, you get the perfect combination of performance and toughness that comes standard with InfraSave radiant heaters. Your customer will toast to their comfort!

\*IW has a Stainless steel burner cabinet

A

### Full Featured Burner

Weatherproof cabinet with durable powder coating protects your investment. Indicator status lights simplify troubleshooting and reduce maintenance costs.

B

**Louvered Bottom Panel** of the burner cabinet allows combustion airflow. Eliminates unsightly air ducts and protects against water incursion.

C

**Durable Aluminized Steel Focus Shield Reflectors and Closed Reflector Ends** extend below tube surface to trap convection heat and convert it to infrared heat. Provides additional comfort and economy of operation.

D

**Aluminized Steel Tube System** resists corrosion and further protects your investment. Swaged tube connection ensures system integrity and alignment.

E

**Webbed Hangers** promote free passage of entrapped convection heat along the tube system, providing more uniform heat output and improved comfort levels.

NOTHING TO HIDE
